Jihun Park

DRAM Design Engineer at SK Hynix, Icheon, Korea

(+82)010-3594-5276 hun0122232@gmail.com github.com/hun01222 linkedin.com/in/jhpark02

Research Interest

Driven by a strong background in next-generation memory architectures such as PIM, I am committed to advancing high-bandwidth and energy-efficient DRAM designs tailored for AI computing. I aspire to contribute to next-level DRAM scaling and speed optimization through rigorous hardware design and verification.

Industry

SK Hynix — **Icheon, Korea**
DRAM Design Engineer — *July 2026 – Present*

Education

Korea University – *B.S. in Semiconductor Engineering* — **Seoul, Korea**
(**GPA:** 4.28/4.50 (3.92/4.0), Intelligent Digital Systems Lab) — *March 2021 – June 2026 (Early Graduation)*

- Conducting **Automated Design Space Exploration (DSE)** on NeuroSim to optimize PIM architectures for various deep learning workloads, balancing energy efficiency and latency.
- Designed and verified a **C3SRAM macro** using Cadence Virtuoso, completing full-custom schematic design, layout implementation, and comparative analysis via pre-/post-layout simulations.

Busan Il Science High School — **Busan, Korea**
Graduated — *March 2018 – February 2021*

Experience

Intelligent Digital Systems Lab — **Seoul, Korea**
Undergraduate Researcher, Advisor: Prof. Jaeha Kung — *June 2025 – June 2026*

Republic of Korea Air Force — **Busan, Korea**
Automotive Driver, Squad Leader — *February 2022 – November 2023*

Honors & Awards

Semester High Honors (Spring 2021, Fall 2021, Spring 2024, Fall 2024)
Awarded to undergraduate students achieving a GPA of 4.0 or higher for a semester — *2021 – 2024*

Industry-Academia Scholarship
*Fully funded by **SK Hynix**, providing tuition fee exemption* — *2021 – 2026*

Korea University Alumni Scholarship (Spring 2025, Fall 2025, Spring 2026)
*A merit-based scholarship sponsored by **Korea University Alumni Association*** — *2025 – 2026*

Dean's List (Fall 2025)
Achieved a perfect GPA of 4.5 — *2025*

Skills

Hardware & Tools: Cadence Virtuoso, Synopsys Design Compiler, NVIDIA Jetson, OpenRoad, Pspice, Git/Linux
Programming & Languages: C/C++, CUDA, Python, Verilog, MATLAB
Frameworks & Libraries: PyTorch, TensorRT, ONNX
Languages: Korean (Native), English (Fluent)
