Research Interest

I have enthusiasm for next-generation memory architectures and technologies, including PIM and CXL, which are widely utilized in AI. I aspire to enhance computational speed and power efficiency by conducting in-depth research on advanced memory technologies.

Industry

SK Hynix

Employment scheduled to begin in July 2026 at SK hynix

Icheon, Korea

July 2026 (scheduled)

Education

Korea University – B.S. in Semiconductor Engineering

(GPA: 4.28/4.50 (3.93/4.0), Intelligent Digital Systems Lab)

Seoul, Korea

March 2021 – June 2026 (Early Graduation)

- Conducting in-depth analysis of **NeuroSim** source code to design an energy-efficient **SRAM-to-RRAM** porting strategy for In-Memory Computing (IMC) architectures.

Busan Il Science High School

Graduated

Busan, Korea

March 2018 – February 2021

Experience

Intelligent Digital Systems Lab

Undergraduate Researcher, Advisor: Prof. Jaeha Kung
